

Hosting packages for your website

Your new web site must physically reside on a computer (a server) that's connected to the internet, and managed by a hosting company, which ensures it is always available to anyone searching the internet. Included in the web presence package is hosting for 1 year. We will remind you when your hosting is due for renewal, and if you renew, will take care of all the necessary procedures to keep your website available to your customers for the renewal term, this includes the renewal of your domain name. We have various hosting packages available to suit all types and applications of websites. All our hosting packages, when purchased in conjunction with a website, include total support for your website and email accounts. For more information on our hosting packages please contact our sales team on 01159 722 050
